The Gnostic Gospels is a title given to the Gnostic gospels, which are a collection of ancient Christian texts that were not included in the New Testament. These texts were written by gnostic Christians, who believed that the true message of Jesus was not contained in the New Testament, but was revealed to them by their leaders. The Gnostic Gospels were often written in a highly symbolic and mystical style, and many of them contain references to the idea of a secret or esoteric knowledge that was passed down from generation to generation. The most famous of the Gnostic Gospels are the Gospel of Thomas and the Gospel of Mary Magdalene.

In this highly original work, Elaine Pagels demonstrates how evidence from gnostic sources may challenge the assumption that Paul writes his letters to combat “gnostic opponents” and to repudiate their claims to secret wisdom. Drawing upon the Gnostic Paul, Pagels argues that Paul's letters are not primarily polemical, but rather are a means of expressing his own spiritual insights and visions. In her work, Pagels challenges the traditional view that gnosticism was a purely negative force that sought to undermine the authority of the church. Instead, she suggests that gnosticism was a legitimate and even necessary part of the Christian experience, providing a source of inspiration and enlightenment for believers. 

Pagels's approach is based on a detailed examination of the gnostic literature, which includes not only the Nag Hammadi Library and other extant texts, but also the many gnostic writings that have been lost or destroyed. By examining the gnostic sources in their historical context, Pagels is able to present a more nuanced and complex picture of gnosticism than has been available in previous studies. 

Pagels's work has been widely praised for its originality and its rich insights into the religious and spiritual experience of early Christianity. It has helped to broaden our understanding of the gnostic movement and its role in shaping the development of Western religion and thought.
