**Comparative Indo-European Linguistics**
Robert Stephen Paul Beekes - 2011
This book gives a comprehensive introduction to Comparative Indo-European Linguistics. It starts with a presentation of the languages of the family (from Germanic languages, the Celtic and Slavic languages, Latin, Greek and Sanskrit through Armenian and Albanian) and a discussion of the culture and origin of the Indo-Europeans, the speakers of the Indo-European proto-language. The reader is introduced into the nature of language change and the
with a presentation of the older language stages, with many examples (from the Indo-European languages). A full description is given of the sound changes, which makes it possible to follow the origin of the different Indo-European languages step by step. This is followed by a discussion of the development of all the morphological categories of Proto-Indo-European. The book presents the latest in scholarly insights, like the laryngeal and glottalic theory, the accentuation, the ablaut patterns, and these are systematically integrated into the treatment. The text of this second edition has been corrected and updated by Michiel de Vaan. Sixty-six new exercises enable the student to practice the reconstruction of PIE phonology and morphology.

**A Compendium of the Comparative Grammar of the Indo-European, Sanskrit, Greek and Latin Languages** - August Schleicher - 1874
This Textbook on Indo-European Linguistics is designed as an introduction to the field. It presents current topics and questions in Indo-European linguistics in a clear and informative manner. This is the English translation of the eight edition of the work first published by Hans Krahe and it takes account of more recent research. While Krahe only considered phonology and morphology, the edition also includes a comprehensive account of syntax and lexis. Manfred Mayrhofer assisted with the section of phonology; Matthias Fritz wrote the section on syntax and provided support for the project as a whole.

This book presents, for the first time in English, a complete critical survey of the theory and methodology of Indo-European linguistics, from its origins two centuries ago to the present day.

The ability to compare is fundamental to human cognition. Expressing various types of comparison is thus essential to any language. The present volume presents detailed grammatical descriptions of how comparison and gradation are expressed in ancient Indo-European languages. The detailed chapters devoted to the individual languages go far beyond standard handbook knowledge. Each chapter is structured the same way to facilitate cross-reference and (typological) comparison. The data are presented in a top-down fashion and in a format easily accessible to the linguistic community. The topics covered are similatives, equatives, comparatives, superlatives, elatives, and excessives. Each type of comparison is illustrated with attested grammatical realizations. The book is an indispensable tool for typologists, historical linguists, and students of the syntax and morphosyntax of comparison.

Comparative-historical Linguistics - Bela Brogyanyi - 1993-01-01
This volume offers an important contribution to the comparative historical study of languages. Most of the articles deal with topics concerning the Indo-European proto-language as well as the individual languages descended from it. Essays in Finno-Ugric philology complete the volume. The book is divided in 8 sections: I. Indo-European, II. Anatolian, III. Indic, IV. Iranian and Armenian, V. Celtic, VI. Germanic Languages, VII. Slavic and Albanian, VIII. Fennougrica and Altaica.

Our linguistic ancestors had used the wheel, were settled arable farmers, kept sheep and cattle, brewed beer, got married, made weapons, and had at least 27 verbs for the expression of strife. The subjects to which the authors devote chapters include fauna, flora, family and kinship, clothing and textiles, food and drink, space and time, emotions, mythology, religion, and the continuing quest to discover the Proto-Indo-European homeland.

New Comparative Grammar of Greek and Latin - Andrew L Sihler - 2008-11-13
Like Carl Darling Buck's Comparative Grammar of Greek and Latin (1933), this book is an explanation of the similarities and differences between Greek and Latin morphology and lexicon through an account of their prehistory. It also aims to discuss the principal features of Indo-European linguistics. Greek and Latin are studied as a pair for cultural reasons only; as languages, they have little in common apart from their Indo-European heritage. Thus the only way to treat the historical bases for their development is to begin with Proto-Indo-European. The only way to make a
through an account of their Proto-Indo-European prehistory. It also aims to make a reconstructed language like Proto-Indo-European intelligible and intellectually defensible is to present at least some of the basis for reconstructing its features and, in the process, to discuss reasoning and methodology of reconstruction (including a weighing of alternative reconstructions). The result is a compendious handbook of Indo-European phonology and morphology, and a vade mecum of Indo-European linguistics--the focus always remaining on Greek and Latin. The non-classical sources for historical discussion are mainly Vedic Sanskrit, Hittite, and Germanic, with occasional but crucial contributions from Old Irish, Avestan, Baltic, and Slavic.

**The Indo-European Languages** - Mate Kapović - 2017-01-20

The Indo-European Languages presents a comprehensive survey of the individual languages and language subgroups within this language family. With over four hundred languages and dialects and almost three billion native speakers, the Indo-European language family is the largest of the recognized language groups and includes most of the major current languages of Europe, the Iranian plateau and the Indian subcontinent. Written by an international team of experts, this comprehensive, single-volume tome presents in-depth discussions of the historical development and specialized linguistic features of the Indo-European languages. This unique resource remains the ideal reference for advanced undergraduate and postgraduate students of Indo-European linguistics and experienced researchers looking for an up-to-date survey of separate Indo-European branches. It will be of interest to researchers and anyone with an interest in historical linguistics, linguistic anthropology and language development.

The breadth and the continuing liveliness of enquiry in an area which over the last century and a half has opened many unique windows on the civilizations of the ancient world. The volume is a tribute to Anna Morpurgo Davies to mark her retirement as the Diebold Professor of Comparative Philology at the University of Oxford. The book's six parts are concerned with the early history of Indo-European (Part I); language use, variation, and change in ancient Greece and Anatolia (Parts II and III); the Indo-European languages of Western Europe, including Latin, Welsh, and Anglo-Saxon (Part IV); the ancient Indo-Iranian and Tocharian languages (Part V); and the history of Indo-European linguistics (Part VI). Indo-European Perspectives will interest scholars and students of Indo-European philology, historical linguistics, classics, and the history of the ancient world.

Horse, Chariots and Indo-Europeans - Peter Raulwing - 2000

An overview of the current debate on the origin and spread of horse-drawn chariots with a brief review of the archaeological, archaeozoological, religious, anthropological and technological evidence and a more detailed survey of linguistics. Raulwing outlines the different types of linguistic evidence, with many examples, and a general history of developments and innovations in chariot design and use. He argues that chariots originated in the Near East in the early 2nd millennium BC and that there was no 'horse' or 'wheeled transport' in Proto-Indo-European language.

**Historical and Comparative Linguistics** - Raimo Anttila - 1989-01-01

In any course of historical and comparative linguistics there will be students of different language backgrounds, different levels of linguistic training, and different theoretical orientation. This textbook attempts to mitigate the problems raised by this heterogeneity in a number of ways. Since it is impossible to treat the language or language family of special focus of this book is on English in particular and Indo-European languages in general, with Finnish and its closely related languages for contrast. The tenets of different schools of linguistics, and the controversies among them, are treated eclectically and objectively; the examination of language itself plays the leading role in our efforts to ascertain the comparative value of competing theories. This revised edition (1989) of a standard work for comparative linguists offers an added introduction dealing mainly with a semiotic basis of change, a final chapter on aspects of explanation, particularly in historical and human disciplines, and added sections on comparative syntax and on the semiotic status of the comparative method.

**How to Kill a Dragon** - Calvert Watkins - 1995
In How to Kill a Dragon Calvert Watkins follows the continuum of poetic formulae in Indo-European languages, from Old Hittite to medieval Irish. He uses the comparative method to reconstruct traditional poetic formulae of considerable complexity that stretch as far back as the original common language. Thus, Watkins reveals the antiquity and tenacity of the Indo-European poetic tradition. Watkins begins this study with an introduction to the field of comparative Indo-European poetics; he explores the Saussurian notions of synchrony and diachrony, and locates the various Indo-European traditions and ideologies of the spoken word. Further, his overview presents case studies on the forms of verbal art, with selected texts drawn from Indic, Iranian, Greek, Latin, Hittite, Armenian, Celtic, and

Watkins argues that this formula is the vehicle for the central theme of a proto-text, and a central part of the symbolic culture of speakers of the Proto-Indo-European language: the relation of humans to their universe, the values and expectations of their society. Languages and Beyond - Robert Crellin - 2020-09-15
This volume provides a detailed investigation of perfects from all the branches of the Indo-European language family, in some cases representing the first ever comprehensive description. Thorough philological examinations result in empirically well-founded analyses illustrated with over 940 examples. The unique temporal depth and diatopic breadth of attested Indo-European languages permits the investigation of both TAME (Tense-Aspect-Mood-Evidentiality) systems over time and recurring cycles of change, as well as synchronic patterns of areal distribution and contact phenomena. These possibilities are fully exploited in the volume. Furthermore, the cross-linguistic perspective adopted by many authors, as well as the inclusion of contributions which go beyond the boundaries of the Indo-European family per se, facilitates typological
in the volume. Furthermore, volume is intended to serve as a springboard for future research both into the semantics of the perfect in Indo-European itself, and verb systems across the world’s languages.

**Perfects in Indo-European Languages and Beyond** - Robert Crellin - 2020-09-15
This volume provides a detailed investigation of perfects from all the branches of the Indo-European language family, in some cases representing the first ever comprehensive description. Thorough philological examinations result in empirically well-founded analyses illustrated with over 940 examples. The unique temporal depth and diatopic breadth of attested Indo-European languages permits the investigation of both TAME (Tense-Aspect-Mood-Evidentiality) systems over time and recurring cycles of change, as well as synchronic patterns of areal distribution and contact phenomena. These possibilities are fully exploited the cross-linguistic perspective adopted by many authors, as well as the inclusion of contributions which go beyond the boundaries of the Indo-European family per se, facilitates typological comparison. As such, the volume is intended to serve as a springboard for future research both into the semantics of the perfect in Indo-European itself, and verb systems across the world’s languages.

**A Comparative Grammar of
the Early Germanic
Languages** - R.D. Fulk -
2018-09-15
Fulk’s Comparative Grammar
offers an overview of and
bibliographical guide to the
study of the phonology and
the inflectional morphology of
the earliest Germanic

attention to Gothic, Old Norse
/Icelandic, Old English, Old
Frisian, Old Saxon, and Old
High German, along with
some attention to the more
sparsely attested languages.
The sounds and inflections of
the oldest Germanic
languages are compared, with
a view to reconstructing the
forms they took in Proto-
Germanic and comparing
those reconstructed forms
with what is known of the
Indo-European
protolanguage. Students will
find the book an informative
introduction and a
bibliographically instructive
point of departure for
intensive research in the
numerous issues that remain
profoundly contested in early
Germanic language history.

The Indo-European Languages - Mate Kapovic - 2019-12-12
The Indo-European Languages presents a comprehensive survey of the individual languages and language subgroups within this language family. With over four hundred languages billion native speakers, the Indo-European language family is the largest of the recognized language groups and includes most of the major current languages of Europe, the Iranian plateau and the Indian subcontinent. Written by an international team of experts, this comprehensive, single-volume tome presents in-depth discussions of the historical development and specialized linguistic features of the Indo-European languages. This unique resource remains the ideal reference for advanced undergraduate and postgraduate students of Indo-European linguistics and languages, but also for more experienced researchers looking for an up-to-date survey of separate Indo-European branches. It will be of interest to researchers and anyone with an interest in historical linguistics, linguistic anthropology and language development.

**An Introduction to Proto-Indo-European and the Early Indo-European Languages** - Joseph B. Voyles - 2009

An Introduction to Proto-Indo-European and the Early Indo-European Languages is intended to supply the reader with what Oswald Szemerenyi has termed the "basic equipment" for any in-depth study of Indo-European: namely, some knowledge of Gothic, Latin, Ancient Greek, Old Church Slavic, Sanskrit, and Hittite. The first chapter provides an introduction to synchronic and diachronic terminology and method as well as a basic outline of reconstructed Proto-Indo-European phonology and morphology, along with some basic syntax, such as the function of cases, tenses, and moods. Completing this chapter are exercises on comparative method and reconstruction, with answers to the exercises provided in the Key to the chapter.

With its range focused on Indo-European and extending across Eurasia and into the Americas, this collection of seventeen studies investigates various aspects of the long-range comparison and classification of Indo-European and other major language groups. European and other major language groups. Some of them confront the controversial question of whether Indo-European and certain other language families had, extending the celebrated phrase of Sir William Jones in 1786, 'sprung from some common source'. With comparative linguistics of recent decades in danger of stifling from an excess of caution, the quest for the answer to that question has now been broadened to attempt to find a deeper common source than Proto-Indo-European. This volume surveys the progress of the genetic classification of languages over the years, records recent developments, and points to abundant opportunities for future research. The contributors - some of the world’s leading investigators of the genetic classification of languages - have adopted a broad outlook, looking beyond comparative Indo-European linguistics in two ways:

**Tracing the Indo-Europeans** - Birgit Anette Olsen - 2019-08-23

Recent developments in aDNA has reshaped our understanding of later European prehistory, and at the same time also opened up for more fruitful collaborations between archaeologists and historical linguists. Two revolutionary genetic studies, published independently in Nature, 2015, showed that prehistoric Europe underwent two successive waves of migration, one from Anatolia consistent with the introduction of agriculture, and a later influx from the Pontic-Caspian steppes which without any reasonable doubt pinpoints the archaeological Yamnaya complex as the cradle of (Core-)Indo-European languages. Now, for the first time, when the preliminaries are clear, it is possible for the fields of genetics, archaeology and historical linguistics to cooperate in a constructive fashion to refine our knowledge of the Indo-European homeland, migrations, society and language. For the historical-comparative linguists, this opens up a wealth of exciting perspectives and new working fields in the intersections between linguistics and neighbouring disciplines, for the archaeologists and geneticists, on the other hand, the linguistic contributions help to endow the material
