Theology as History and Hermeneutics - Laurence W. Wood - 2005
This book offers in style and content an exciting new perspective on contemporary theology and its future in post-modern times. I welcome this new perspective. The style is agreeable, unpolemical, and engages in dialogue with the best of Barth and Bultmann, Ricoeur and Pannenberg, Cobb and Moltmann, showing what they have to offer to the larger theological community and transferring it like a ferry boat into the post-modern age. The purpose is to offer an evangelical theology which is at the same time genuinely evangelical and relevant for post-modern ways of thinking. Wood writes with admirable clarity." --Jürgen Moltmann, University of Tübingen

**The Oxford Handbook of Theology and Modern European Thought**
- Nicholas Adams - 2013-02-28
'Modern European thought' describes a wide range of philosophies, cultural programmes, and political arguments developed in Europe in the period following the French Revolution. Throughout this period, many
of the wide range of 'modernisms' (and anti-modernisms) had a distinctly religious and even theological character—not least when religion was subjected to the harshest criticism. Yet for all the breadth and complexity of modern European thought and, in particular, its relations to theology, a distinct body of themes and approaches recurred in each generation. Moreover, many of the issues that took intellectual shape in Europe are now global, rather than narrowly European, and, for good or ill, they form part of Europe's bequest to the world—from colonialism and the economic theories behind globalisation through to democracy to terrorism. This volume attempts to identify and comment on some of the most important of these. The thirty chapters are grouped into six thematic parts, moving from questions of identity and the self, through discussions of the human condition, the age of revolution, the world (both natural and technological), and knowledge methodologies, concluding explicitly at how major theological themes have developed in modern European thought. The chapters engage with major thinkers including Kant, Hegel, Kierkegaard, Heidegger, Schleiermacher, Nietzsche, Dostoevsky, Barth, Rahner, Tillich, Bonhoeffer, Sartre, de Beauvoir, Wittgenstein, and Derrida, amongst many others. Taken together, these new essays provide a rich and reflective overview of the interchange between theology, philosophy and critical thought in Europe, over the past two hundred years.

**The Oxford Handbook of Natural Theology** - Russell Re Manning - 2013-01-17

The Oxford Handbook of Natural Theology is the first collection to consider the full breadth of natural theology from both historical and contemporary perspectives and to bring together leading scholars to offer accessible high-level accounts of the major themes. The volume embodies and develops the recent revival of interest in natural theology as a topic of serious critical engagement. Frequently misunderstood or polemicized, natural theology is an under-studied yet persistent and pervasive presence throughout the history of thought about ultimate reality - from the classical Greek theology of the philosophers to twenty-first-century debates in science and religion. Of interest to students and scholars from a wide range of disciplines, this authoritative handbook draws on the very best of contemporary scholarship to present a critical overview of the subject area. Thirty-eight new essays trace the transformations of natural theology in different historical and religious contexts, the place of natural theology in different philosophical

The Oxford Handbook of
Natural Theology is the first
collection to consider the full
breadth of natural theology
from both historical and
contemporary perspectives
and to bring together leading
scholars to offer accessible
high-level accounts of the
major themes. The volume
embodies and develops the
recent revival of interest in
natural theology as a topic of
serious critical engagement.
Frequently misunderstood or
polemicized, natural theology
is an under-studied yet
persistent and pervasive
presence throughout the
history of thought about
ultimate reality - from the
classical Greek theology of
first-century debates in
science and religion. Of
interest to students and
scholars from a wide range of
disciplines, this authoritative
handbook draws on the very
best of contemporary
scholarship to present a
critical overview of the
subject area. Thirty-eight new
essays trace the
transformations of natural
theology in different historical
and religious contexts, the
place of natural theology in
different philosophical
traditions and diverse
scientific disciplines, and the
various cultural and aesthetic
approaches to natural
theology to reveal a rich seam
of multi-faceted theological
reflection rooted in human
nature and the environments
within which we find
ourselves.

The forty-four chapters are organized into the following parts five parts: Sacramental Roots in Scripture, Patristic Sacramental Theology, Medieval Sacramental Theology, From the Reformation through Today, and Philosophical and Theological Issues in Sacramental Doctrine. Contributors to this Handbook explain the diverse ways that believers have construed the sacraments, both in inspired Scripture and in the history of the Church's practice. In Scripture and the early Church, Orthodox, Protestants, and Catholics all find evidence that the first Christian communities celebrated and taught about the sacraments in a manner that Orthodox, Protestants, and Catholics today affirm as the foundation of their own faith and practice. Thus, for those who want to understand what has been taught about the sacraments in Scripture and across the generations by the major thinkers of the various Christian traditions, this Handbook provides an introduction. As the divisions in Christian sacramental understanding and practice are certainly evident in this Handbook, it is not thereby without ecumenical and missional value. This book evidences that the story of the Christian sacraments is, despite divisions in interpretation and practice, one of tremendous hope.“--Publisher.

view points, while also Medieval appropriations of the Trinitarian faith, the Reformation through to the 20th Century, Trinitarian Dogmatics, the Trinity and Christian life, and Dialogues (addressing ecumenical, interreligious, and cultural interactions). The phrase 'Trinitarian faith' can hardly be understood outside of reference to the Councils of Nicaea and Constantinople and to their reception: the doctrine of the Trinity is indissociably connected to the reading of Scripture through the ecclesial and theological traditions. The modern period is characterized especially by the arrival of history, under two principal aspects: 'historical theology' and 'philosophies of history'. In contemporary theology, the principal 'theological loci' are Trinity and creation, Trinity and grace, Trinity and monotheism, Trinity and human life (ethics, society, politics and culture), and more broadly Trinity and history. In all these areas, this handbook offers essays that do justice to the diversity of providing, insofar as possible, a coherent ensemble.

This handbook examines the history of Trinitarian theology and reveals the Nicene unity still at work among Christians today despite ecumenical differences and the variety of theological perspectives. The forty-three chapters are organized into the following seven parts: the Trinity in Scripture, Patristic witnesses to the Trinitarian faith, Medieval appropriations of the Trinitarian faith, the Reformation through to the 20th Century, Trinitarian Dogmatics, the Trinity and Christian life, and Dialogues (addressing ecumenical, interreligious, and cultural interactions).
