Language, Logic, Information, and Computation - Josu Väätäinen - 2016-08-05
Edited in collaboration with FoLLI, the Association of Logic, Language and Information this book constitutes the refereed proceedings of the 23rd Workshop on Logic, Language, Information and Communication, WoLLIC 2016, held in Puebla, Mexico, in August 2016. The 23 contributed papers, presented together with 9 invited lectures and tutorials, were carefully reviewed and selected from 33 submissions. The focus of the workshop is to provide a forum on interdisciplinary research involving formal logic, programming and computational theory, and natural language and reasoning.

Church Quarterly Review - 1907
Input Materials in SLA - Thorsten Piske - 2009
This volume bridges the gap between theory and practice by bringing together well-known and new authors who discuss a topic of mutual interest to second language researchers and teachers alike. Reader-friendly chapters offer a range of existing and new perspectives on input in morphology, syntax, phonology and phonetics.

Evidence-Based Second Language Pedagogy - Matsuhisa Sato - 2019-05-17
Evidence-Based Second Language Pedagogy is a comprehensive technical manual for teachers of English as a second language written by teachers. This book provides a concise, practical discussion of research-based teaching strategies, including general pedagogy, vocabulary, grammar, reading, writing, listening, motivation, and professional development. It is designed for teachers who want to incorporate research-based teaching strategies into their own teaching practice.

both in science and in practical affairs we reason by combining facts only inconclusively supported by evidence. Building on an abstract understanding of this process of combination, this book constructs a new theory of epistemic probability. The theory draws on the work of A. P. Dempster but diverges from Depster's viewpoint by identifying his "lower probabilities" as epistemic probabilities and taking his rule for combining "upper and lower probabilities" as the rule of effective epistemic consequence. The book contains: a brief treatment of statistical inference and a discussion of the limitations of epistemic probability. Appendices contain mathematical proofs, which are relatively elementary and seldom depend on mathematics more advanced than high school algebra.

A two-time AJN Book of the Year Award winner and a 2013 Doody Core Title! This distinguished text provides top-tier guidance for advanced practice nurses on how to perform a comprehensive systematic review of available research to inform scholarly work, particularly in DNP and PhD programs. With a strategic focus on the search process and assessing the quality of the evidence, this text presents, clearly and comprehensively, all of the knowledge and skills necessary to conduct a foundational CSR in eight concrete steps. This text examines how to write a CSR proposal, final report, and a policy brief based on systematic review findings. Two finished proposals and two completed systematic reviews demonstrate each step of the process from start to finish. Additionally, the text covers software used in research queries and provides helpful strategies for effectively using the search function when seeking information. The Third Edition offers four new chapters with incisive recommendations for performing a CSR and addressing new ways CSR is being implemented in today’s healthcare environment. It describes the latest methodological advances, including living systematic reviews and dominance scores for economic review.
