This volume offers the perspectives of such thinkers as Richard M. Merelman, Judith Torney-Purta, Henry M. Levin, Richard G. Niemi, Roberta S. Sigel, and Stanley A. Renshon. The book is divided into five sections. Part 1 relates political socialization to the functioning of democracy. Part 2 presents three different models for the acquisition of political attitudes and behaviours. In Part 3, the institutional context of political socialization is discussed. The role new movements play as socializers forms the focus of Part 4. And two concluding chapters in Part 5 extend the concerns of this book beyond childhood into responsible adult citizenship. Political Socialization, Citizenship Education, and Democracy can be used as a supplemental text in courses on foundations of education, educational psychology, sociology of education, as well as political science. It should be of interest to researchers in those areas, and social scientists in general.

**Generations and Politics**
M. Kent Jennings 2014-07-14

Kent Jennings and Richard Nieini are recognized widely for their 1965 study of the development of political attitudes and behavior.
among a large, nationally representative sample of high school seniors and their parents (The Political Character of Adolescence, Princeton). Now they present the results of a follow-up study of these same individuals in 1973 along with a fresh study of 1973 high school seniors. Spanning a dramatic eight-year historical period and an important transitional phase in the life cycle of the younger generation, this material provides a unique opportunity to assess the development of political attitudes and participation. Originally published in 1981. **The Political Life of Children** Robert Coles

2007-12-01 A groundbreaking study of the impact of current events on the lives and minds of children from the Pulitzer Prize-winning child psychiatrist. Most parents teach their children the lessons and skills they need to function in the world while trying to shield them from the harsher realities of life. But long before children are...
considered ready to face the complications of the real world, they are learning truths and perspectives most adults imagine are beyond them. Child psychiatrist and author of The Spiritual Life of Children, Robert Coles traveled the globe for more than a decade, from Northern Ireland to Nicaragua, South Africa to Southeast Asia, across the United States and beyond, conducting in-depth interviews with children about their cultures, ideologies, national pride, and political knowledge. He learned that the greater challenges, traumas, conflicts, and issues of the world around them find their way into children’s impressionable minds and play a crucial role in their development. Robert Coles’ unique and groundbreaking research sheds much-needed light on the psychology of childhood, revolutionizing both professional and personal understanding of humans’ formative years. “Robert Coles is to the stories that children have to tell what Homer was to the tale of the Trojan War.” —The New York Times Book Review

Political Character of Adolescence
