

TIM ELLIS

Tim Ellis is president of RSR Technologies, a part of the EcoBat group, the world's largest recycler of lead-acid batteries. RSR Technologies is dedicated to research and development in the areas of recycling processes, environmental analytical chemistry and the material science of electrochemical cells. He holds a PhD in metallurgy from Iowa State University along with a Masters in Technology Management degree from the University of Pennsylvania. Dr. Ellis also holds degrees in Chemistry and Metallurgy from Michigan Technological University. Presently, he chairs the SAE Battery Recycling Committee and the Advanced Lead Acid Battery Consortium (ALABC).
