

Maria Antonia Tigre is an environmental lawyer from Brazil. She has worked as an environmental legal advisor for eight years, having worked for law firms, corporations, international organizations, and nonprofits. She began her career in Rio de Janeiro, where she assisted infrastructure clients in environmental impact assessments, environmental permitting procedures, and due diligence. In addition to working for law firms, she also worked for an infrastructure holding company, where she assisted the sustainability board and an energy subsidiary with projects in Brazil and Chile. After relocating to the United States, she interned at the United Nations Mission of Saint Kitts and Nevis working with climate change issues, especially sea-level rise. She was a fellow at the World Resources Institute, having helped the organization prepare a toolkit for urban governance in developing world cities through a comparative analysis of best practices worldwide. She is currently an environmental law fellow at the Cyrus R. Vance Center, working on environmental issues in multiple countries. Ms. Tigre is writing a book on the cooperation between the countries that share the Amazon rainforest, through an analysis of their national forest law and the Amazon Cooperation Treaty Organization. She is a member of the Climate Adaptation Committee and the Committee on International Environmental Law at the New York City Bar Association, and was a visiting scholar at Widener Law School. Ms. Tigre is fluent in Portuguese, English, and German. She holds a bachelor's degree from the Law School of Pontifícia Universidade Católica of Rio de Janeiro, Brazil, and a double LL.M., *magna cum laude*, in environmental law and comparative legal studies from Pace Law School.
