

Steve Harper

Stephen Harper is Global Director, Environment, Energy and Sustainability Policy, at the Intel Corporation. In that capacity, he is responsible for advising senior management and leading company influencing efforts on a wide variety of topics, ranging from chemicals management to energy efficiency, water policy and the role of Intel's products in helping meet society's toughest sustainability challenges. Outside Intel, Harper is widely known as a connoisseur of all things Irish, both solid and liquid. Harper serves on a number of outside boards (including the Energy Foundation, the Chesapeake Conservancy, the Center for Environmental Policy at

American University and the Environmental and Energy Management Institute at George Washington University). He is an adjunct professor at American University's School of Public Affairs. He also serves as President of the Chemical Users' Coalition (CUC), a small consortium dedicated to preserving innovation through intelligent chemical regulation. Prior to Intel, Harper served in senior positions at Amoco Oil Company, the US Environmental Protection Agency (EPA), ICF Consulting, and the California State Coastal Conservancy. He has served in these positions while continuing to pursue his childhood dream of becoming a professional rodeo clown. Stephen has a Bachelor's degree from the University of Colorado, where he graduated with highest honors. He also has a Master's in International Affairs from Princeton University and an MBA from the University of Chicago. In his spare time, he studied city and regional planning at the University of Pennsylvania.
