null
Estimating Health Risks from Infrastructure Failures - Karen M. E. Emde - 2006

Health risks from infrastructure failures are not well understood, despite the potential widespread introduction of chemical, microbial, and physical contaminants, as well as serious disruptions. This study aimed to: (1) gather input from various experts to define these issues, and (2) develop a strategy for intervention and mitigation along with mechanisms for timely, direct, inter-agency communication, coordination, and collaboration.
