**Honour Killing in the Second Decade of the 21st Century** - Shahnaz Shoro - 2017-08-21
Honour killing is considered the worst form of domestic violence against human beings, particularly against women. It is clear that societies across the world - through their laws and their courts - continue to countenance legal defences which overwhelmingly benefit males committing violence against females. Despite the statistics that honour killings are being reported from all over the world, the greatest number of shocking reports of honour killings come from Muslim countries. Unfortunately, Pakistan is among those countries where women are facing various forms of violence in the name of religion, customs and traditions, and cases of honour killing are regularly reported there. It is imperative to understand and see killings in the name of honour from the perspective of those who have been directly affected by the socio-religious cultural norms which condone them.

Honour Killing in the Second Decade of the 21st Century - Shahnaz Shoro - 2017-08-21

It is clear that societies across the world – through their laws and their courts – continue to countenance legal defences which overwhelmingly benefit males committing violence against females. Despite the statistics that honour killings are being reported from all over the world, the greatest number of shocking reports of honour killings come from Muslim countries. It is imperative to understand and see killings in the name of honour from the perspective of those who have been directly affected by the socio-religious cultural norms which condone them. The findings gathered here show that honour killing is not only family or community violence or a tradition to preserve honour, but that behind these killings ulterior purposes are being served and therefore the number of the killings is increasing every year in Pakistan. This book will allow the reader to understand precisely the menace of honour killing and to consider how it can be addressed to save innocent lives and to stop these severe violations of human rights.

Honour killing persists around the Middle East, where regimes refrain from tackling primitive traditions for fear of sparking unrest. Ayse Onal interviewed imprisoned men in Turkey convicted of killing their mothers, sisters, and daughters. The result is a revealing and ultimately tragic account of ruined lives - both the victims' and the killers' - in a country where state and religion conspire to hush up the killing of hundreds of women every year. 'Ayse Onal has done an immense service by revealing what it is like to live in an honour-based society and the terrible cost, not just to the women who are beaten and eventually killed, but to the perpetrators and other relatives.' Joan Smith. 'A compelling, disturbing examination of a tradition that stubbornly persists in modern Turkey' Guardian

Honour killing, as it is widely understood, is the cold-blooded murder of a woman or a man involved with her, by the male members of her household in order to cleanse the reputation of the family, clan, community or tribe. This violent tradition in the name of religion, custom and culture continues to be carried out in a significantly large part of the world. child, all of which are perceived as bringing shame on the family. However, current research on honour killing suggests that there are a number of intriguing and very cleverly knitted plots of jealousy, greed, violence and murder which show that, in the name of honour, various other purposes are being served and people are killed in ways which give the impression that they are honour killings. By collecting data from people involved in such situations, this book opens a Pandora’s box, showing that such killings are carried out not to assuage the hurt honour of a patriarchal society, but to serve a variety of malign intentions, goals and agendas. It will serve to let the world comprehend the phenomenon of honour-related violence where culture and crime unite under the umbrella of highly discriminating laws against women. This book consists of twenty-six testimonies from those involved in honour killings, bringing together interviews with killers, victims and the

women are imprisoned for their own “protection,” while their potential killers walk free? Wold spent more than five years in Jordan, visiting prisons and mosques, reviewing newspapers and judicial archives, and interviewing imams, village elders, and other locals to understand these violent acts. But she also spoke with the killers themselves, including a man who murdered his mother and daughter and attempted to kill his other daughter. In Inside an Honor Killing, Wold shares what she learned, weaving a shocking tale of honor killing told from the perpetrators’ perspective as well as the victims’.

Honour - Caroline Goode - 2020-03-26
When Rahmat Sulemani reported his girlfriend Banaz missing, it quickly became clear to DCI Caroline Goode that something was very wrong. In fact, Banaz had contacted her local police station multiple times before, even listing the names of the men she expected to murder her in a so-called ‘honour’ killing. Her parents didn’t seem worried, but Banaz had already accused them of being part of the plot. DCI Goode’s team took on the investigation before they even had proof that a murder had taken place. What emerged was a shocking story of betrayal and a community-wide web of lies, which would take the team from suburban south London to the mountain ranges of Kurdistan, making covert recordings and piecing together cell phone data to finally bring the killers to justice.

This interdisciplinary collection provides a compelling analysis of the practices and beliefs that lead to violence against women, men and children in the name of 'honour', with a range of international insights from criminology, psychology, law and history. The volume advances legal and theoretical debates through the analysis of established research and presents new evidence and insights, addressing key questions such as: What psychological processes are relevant in the motivation of honour violence? Under what historical circumstances, and through what strategies, have honourable masculinity and violence been dissociated? Can honour be reconceptualised in ways that challenge violent practices justified in its name? By locating 'honour' killing and 'honour' based violence within and beyond debates on violence against women and girls, this collection offers recommendations to inform both theory and practice, making this an essential resource for teachers and students, health professionals, police officers, lawyers, social workers, policymakers, and activists working against gendered
forms of violence.

The practice of karo kari allows family, especially fathers, brothers and sons, to take the lives of their daughters, sisters and mothers if they are accused of adultery. This volume examines the central position of karo kari in the social, political and juridical structures in Upper Sindh, Pakistan. Drawing connections between local contests over marriage and resources, Nafisa Shah unearths deep historical processes and power relations. In particular, she explores how the state justice system and informal mediations inform each other in state responses to karo kari, and how modern law is implicated in this seemingly ancient cultural practice.

In the sixteenth and seventeenth centuries, Russians from all ranks of society were bound together by a culture of honor. Here one of the foremost scholars of early modern Russia explores the intricate and highly stylized codes that made up this culture. Nancy Shields Kollmann describes how these codes were manipulated to construct identity and enforce social norms—and also to defend against insults,
surprising degree of local autonomy throughout communities. She offers evidence for a new view of the relationship of state and society in the Russian empire, and her richly comparative approach enhances knowledge of statebuilding in premodern Europe. By presenting Muscovite state and society in the context of medieval and early modern Europe, she exposes similarities that blur long-standing distinctions between Russian and European history. Through the prism of honor, Kollmann examines the interaction of the Russian state and its people in regulating social relations and defining an individual's rank. She finds vital information in a collection of transcripts of legal suits brought by elites and peasants alike to avenge insult to honor. The cases make clear the conservative role honor played in society as well as the ability of men and women to employ this body of ideas to address their relations with one another and with the state. Kollmann demonstrates that the grand princes—and later the tsars—tolerated a

their rapidly expanding realm. Her work marks a stark contrast with traditional Russian historiography, which exaggerates the power of the state and downplays the volition of society.

State and Legal Practice in the Caucasus -

Legal pluralism and the experience of the state in the Caucasus are at the centre of this edited volume. This is a region affected by a multitude of legal orders and the book describes social action and governance in the light of this, and considers how conceptions of order are enforced, used, followed and staged in social networks and legal practice. Principally, how is the state perceived and how does it perform in both the North and South Caucasus? From elections in Dagestan and Armenia to uses of traditional law in Ingushetia and Georgia, from repression of journalism in Azerbaijan to the narrations of anti-corruption campaigns in Georgia - the text reflects the multifarious uses and performances of law and order. The collection includes approaches from different scholarly traditions and their respective theoretical background and therefore forms a unique product of multinational encounters. The volume will be a valuable resource for legal and political
and their respective theoretical background and academics working in the areas of post-socialism and post-colonialism.

This is a region affected by a multitude of legal orders and the book describes social action and governance in the light of this, and considers how conceptions of order are enforced, used, followed and staged in social networks and legal practice. Principally, how is the state perceived and how does it perform in both the North and South Caucasus? From elections in Dagestan and Armenia to uses of traditional law in Ingushetia and Georgia, from repression of journalism in Azerbaijan to the narrations of anti-corruption campaigns in Georgia - the text reflects the multifarious uses and performances of law and order. The collection includes approaches from different scholarly traditions therefore forms a unique product of multinational encounters. The volume will be a valuable resource for legal and political anthropologists, ethnohistorians and researchers and academics working in the areas of post-socialism and post-colonialism.

International Human Rights Law and Crimes Against Women in Turkey - Ayşe Güneş - 2020-12-21
This book evaluates the effectiveness of current international human rights law, and in particular the recent Istanbul Convention, in eradicating so-called honour killings in Turkey. So-called ‘honour killings’ have become an issue of concern for the international community. In Turkey, in particular, the practice still exists despite the adoption of the relevant human rights instruments. The book argues that the improvement of the status of women in Turkey in accordance with gender equality as well as the application of the principle of state due diligence, both requirements of the Istanbul Convention and international human rights law, are
international human rights law and feminist legal killing of women in the name of ‘honour’. Using feminist approaches, in particular the intersectionality approach, the study looks at the application of such standards as well as the current obstacles. Through such a lens, the study discusses the strengths and weaknesses of the Turkish Constitution, Turkish Civil Code, Turkish Penal Code and Law to Protect Family and Prevent Violence Against Women and questions the judicial approach to the implementation of the women’s right to life. It identifies the lacunae in the Turkish legislation that allow inadequate legal protection for women and the inconsistency of the judicial approach to the definition of the so-called honour killings in the judgements. The study then recommends some concrete amendments to the relevant legal provisions in order to better reflect the international framework and the feminist approaches. The book will be a valuable resource for academics, researchers and policy-makers in the areas of international human rights law and feminist legal theory.

Why are honour killings and honour-related violence (HRV) so important to understand? What do such crimes represent? And how does HRV fit in with Western views and perceptions of Islam? This distinctively comparative collection examines the concept of HRV against women in general and Muslim women in particular. The issue of HRV has become a sensitive subject in many South Asian and Middle Eastern countries and it has received the growing attention of the media, human rights groups and academics around the globe. However, the issue has yet to receive detailed academic study in the United Kingdom, particularly in terms of both legal and sociological research. This collection sets out the theoretical and ethical parameters of the study of HRV in order to address this intellectual vacuum in a socio-legal context. The key objectives of this book are: to construct, and to develop further, a theory of HRV; to rationalise and characterise the different forms of HRV; to investigate the
Kingdom, particularly in terms of both legal and this context, in particular, the role of Islam; to scrutinise the role of the civil/criminal law/justice systems in preventing these crimes; and to inform public policy-makers of the potential policies that may be employed in combating HRV.

**Price of Honor** - Jan Goodwin - 2002-12-31  
A NEW YORK TIMES NOTABLE BOOK “Explains powerfully how Muslim women are affected by the rise of fundamentalism.”—Dan Rather  
In recent years, the expanding movement of militant Islam has changed the way millions think, behave, dress, and live, but nowhere has its impact been more powerfully felt than in its dramatic, often devastating effect on the lives of women. Award-winning journalist Jan Goodwin traveled through ten Islamic countries and interviewed hundreds of Muslim women, from professionals to peasants, from royalty to rebels. The result is an unforgettable journey into a world where women are confined, isolated, even killed for the sake of a “code of honor” created and zealously enforced by men. Price of Honor brings to life a world in which women have become pawns in a bitter power game, and gives readers a provocative look inside Muslim society today—in their own words.

**Analysis of Socio-Economic Conditions** - Gianni Betti - 2021-03-22
Showcasing fuzzy set theory, this book highlights the enormous potential of fuzzy logic in helping to analyse the complexity of a wide range of socio-economic patterns and behaviour. The contributions to this volume explore the most up-to-date fuzzy-set methods for the measurement of socio-economic phenomena in a multidimensional and/or dynamic perspective. Thus far, fuzzy-set theory has primarily been utilised in the social sciences in the field of poverty measurement. These chapters examine the latest work in this area, while also exploring further applications including social exclusion, the labour market, educational mismatch, sustainability, quality of life and violence against women. The authors demonstrate that real-world situations are often characterised by imprecision, uncertainty and vagueness, which cannot be properly described by the classical set theory which uses a simple true–false binary logic. By contrast, fuzzy-set theory has been shown to be a powerful tool for describing the multidimensionality and complexity of social phenomena. This book will be of significant interest to economists, statisticians and sociologists utilising quantitative methods to explore socio-economic phenomena.
