The book's main focus is on the development and clinical application of advanced technologies. The first part of the book provides an overview of the principles and applications of digital technologies in health care, including electronic health records, clinical decision support systems, and telemedicine. The second part discusses the ethical, legal, and social implications of digital technologies in health care, including issues related to privacy, security, and patient empowerment. The third part examines the role of digital technologies in public health, including the use of digital tools for disease surveillance and health promotion. The book is a valuable resource for health professionals, researchers, and policymakers who are interested in understanding the opportunities and challenges presented by digital technologies in health care.
Global Marketing Management: Kotabe and Helsen - 2018-09-03

Examination of the procedures and techniques that underlie the marketing strategy of multinational enterprises.

The Regional Multinational: Kotabe and Helsen - 2018-09-03

The Regional Multinational: Kotabe and Helsen - 2018-09-03

Examination of the procedures and techniques that underlie the marketing strategy of multinational enterprises.

Managing International Marketing: Kotabe and Helsen - 2018-09-03

Examination of the procedures and techniques that underlie the marketing strategy of multinational enterprises.

Redefining Global Strategy, with a New Preface - Pankaj Ghemawat - 2018-04-10

A thoroughgoing new edition of this classic text provides comprehensive coverage of the main tools companies use in seeking to penetrate foreign markets.

Managing International Manufacturing - New - Rugman, Anthony M. - 2018-01-26

The choice of foreign operation methods, whether they are used singly or in combination, is a critical question for internationalising companies.

Managing International Manufacturing - New - Rugman, Anthony M. - 2018-01-26

The choice of foreign operation methods, whether they are used singly or in combination, is a critical question for internationalising companies.

Between 1932 and 1972, approximately six hundred African American men in Alabama served as unwitting guinea pigs in what is now considered one of the worst experimental manipulations in the history of medical research.
