Feminist Theory And International Relations In A Postmodern Era

Cambridge Studies In International Relations

Feminist Theory And International Relations In A Postmodern Era provides a compendium of Tickner's work as a feminist IR scholar, from the late 1980s through to present day. Tickner's work has had a significant impact on feminist international relations scholarship, and her ideas and arguments continue to influence the field today. The book includes Tickner's most significant works, including her groundbreaking research on gender and security, her critique of traditional security studies, and her work on gender and postcolonialism. The book also includes Tickner's reflections on the future of feminist international relations scholarship.

Feminist Theory And International Relations In A Postmodern Era

Cambridge Studies In International Relations

In this book,Tickner presents her key arguments in the field of feminist international relations. She argues that traditional security studies have neglected the role of women and gender in international relations, and that this has led to a distorted and incomplete understanding of the causes and effects of war and conflict. Tickner proposes a new framework for understanding international security in which gender is central to the analysis.

Tickner's work has had a significant impact on feminist international relations scholarship, and her ideas and arguments continue to influence the field today. The book includes Tickner's most significant works, including her groundbreaking research on gender and security, her critique of traditional security studies, and her work on gender and postcolonialism. The book also includes Tickner's reflections on the future of feminist international relations scholarship.

Feminist Theory And International Relations In A Postmodern Era

Cambridge Studies In International Relations

In her preface, Tickner reflects on the development of her work in feminist international relations, and the challenges she faced as a woman working in the field. She notes the importance of continued research and debate in the field, and the need for a more diverse range of voices to be heard. Tickner also discusses the importance of including gender in international relations scholarship, and the need to address the ways in which women are affected by conflict and violence.

This book will appeal to students and scholars interested in Black feminism, Gender and women's studies, Black and ethnic studies, sociology, decoloniality, queer studies.

Ethics and International Relations (IR), once considered along the margins of the IR field, has emerged as one of the most eclectic and interdisciplinary research areas today. Yet the same diversity that enriches this field also makes it a difficult and a conclusion that discusses how the field may progress in the future and what subjects are likely to rise to prominence. Within are 44 distinct and original contributions from scholars teaching and researching in the field, which are helpful for insights on the future of the field.

For over a decade, feminist studies have occupied an extraordinary position in the United States. On the one hand, they have contributed to the development of a strong 'identity' politics; on the other, they have been part of the post-structuralist movement that has challenged traditional liberal frameworks. Both have been helped by the 'feminist critique', which has questioned the unity of the public and the private. This has resulted in the shifting of the focus of feminist studies, from the challenge to the notion of a unitary subject – its experience, truth and presence – and of the massive challenge to Western metaphysics and humanism. Along with race and ethnic studies, feminist enquiry has moved beyond the fiction of a unitary feminism to new theoretical and political horizons. Feminist studies have brought about a transformation in the way we think about the world and about ourselves. They have altered the way we understand the nature of the social, the political, the cultural, and the economic, and the ways in which we think about the relationships between these different aspects of human life.

What is feminist transdisciplinary research? Why is it important? How do we do it? Through 19 contributions from leading international feminist scholars, this book provides new insights into activating transdisciplinary feminist theories, philosophy, spirituality, science studies and sports studies – to trouble traditional conceptions of research, method and practice. The book shows how working beyond disciplinary boundaries, and integrating insights from different disciplines to produce new knowledge, can open up new transdisciplinary thinking and actions in relation to engaging feminist currents in social, gender and race studies. The book offers the multiple lenses of feminist theory and practice and seeks to bring these historical differences and intersections into play with current changes, challenges and opportunities for change. This book’s practically-grounded examples and wide-ranging theoretical orbit are likely to make it an invaluable resource for established scholars and emerging researchers in the social sciences, arts, humanities, education and beyond.

Environmental Risk Communication in China: On the Role of Media in Enhancing Public Engagement in Decisions about Environmental Risk. This book presents a new approach to understanding environmental risk communication in China, where the role of media is becoming increasingly important. It shows how social transformation and technological development in China, the consequences of environmental and health risks demand citizens integrate the role of media in communication and governance. Combining theoretical reflections with real-life examples of Chinese scenarios, the book not only engages a dialogue between Western and Chinese scholarship on risk communication but also explores the current challenges and opportunities in environmental risk communication in China.
